

HEART DISEASE

Consider *Kindful Hospice™* if your patients exhibit

- › Re-hospitalizations or ER visits due to Cardiac Issues
- › Poor response to treatment with water pills
- › History of Heart Attacks
- › History of Fainting
- › Shortness of Breath
- › Lower than normal Ejection Fraction
- › Chest pain with poor response to medication

What you need to know

- › *1 out of 6 patients or roughly 15% of all hospice patients had a primary diagnosis of heart disease*
